

HAMMOND COMMUNICATIONS – FTP DOWNLOADS

ALL REGIONAL & WOMEN'S FINAL FOUR NEWS CONFERENCES

Hammond Communications will be providing all regional news conferences via FTP site only as there will be **NO satellite uplinks**. Here's how to access that FTP footage:

- To access press conferences **via FTP client (Filezilla, Cyberduck, etc) use the following:**
 - **Host:** <ftp3.ftptoyoursite.com>
 - **Port:** 22
 - **Username:** ncaaw2017
 - **Password:** 2017Wncaamedia

- To access press conferences via web browser, enter this information into your browser address bar: ncaawbb.hammondcg.com
 - You will get a prompt to enter a username and password.
 - **Username:** ncaaw2017
 - **Password:** 2017Wncaamedia

 - Each site will have a specific folder (Bridgeport, Lexington, Oklahoma City, Stockton and Dallas) and each press conference file will include the team name in the file name.

 - **NOTE:** As was the case in previous years, the first method is preferred as it uses an actual program designed for FTP download. Most of these are free and readily accessible on the internet. The second method (Web Browser) can be accessed via Chrome, Internet Explorer, Firefox, Safari, etc. When you put in the info, you'll be taken to a prompt for a Username / Password. Once you log in, you can go to the specific folder you want and right click to save the files.

If there are questions from covering media in regard to the FTP, please contact the Hammond Communications representative on site.
